

TRAINING GUIDE

TTS Review

A step-by-step walkthrough of logging in, reading the dashboard, completing an audio-transcript review, and applying the full emotion tag reference

1. Log In

2. Dashboard

3. Review Task

4. Emotion Reference

What this guide covers

Four stages take you from first sign-in to mastering the emotion tag reference.

01

Tool Log In

Sign in with your email and one-time password, then set a new password to secure your account.

02

Dashboard

Filter by date and see how many clips you've accepted, fixed, rejected, or submitted overall.

03

Review Task

Listen to each clip, correct the transcript, tag events and emotions, then accept or reject it.

04

Emotion Reference

Use the full tag library to identify the correct emotion — definitions, cues, and lookalikes for all 19 tags.

Tool Log In

1

Sign in with your credentials

Enter your registered email address and the one-time password (OTP) provided to you.

2

Set a new password

The system will prompt you to create a new password of your own for security purposes.

3

Access your account

Once the password is updated, you can access your account on the TTS Review platform.

Login screen — email, OTP-based password, Sign In

Dashboard

DESKTOP

Date filter, status counters, and completions chart

MOBILE

Same stats, stacked for a phone screen

A quick look at the dashboard

- Use the date filter (Today, Last 7/30 days, All time, Custom) to review production for a specific period.
- Four statuses summarize your work: Accepted, Fixed, Rejected, and Total Submitted.
- Each status shows how many audio clips you worked on and the final status you marked.
- The dashboard is fully responsive — the same filters and counters are available on mobile.

Next: the four statuses explained →

Understanding the four statuses

Every clip you work on lands in exactly one of these buckets.

Accepted

The clip was accepted without any changes to the transcription or tags.

Fixed

You corrected the transcription, event tags, or emotion tags, and then approved the clip.

Rejected

The clip was rejected outright due to a major violation.

Total Submitted

The total number of clips you have worked on in your sessions.

Review Task

Review screen — audio & original transcript (left), corrected transcript & tags (right)

Two-part layout

Section 1 — the audio clip and its original transcript. Section 2 — your corrected transcript, plus event and emotion tag lists.

1

Listen & correct

Play the clip and edit the language or script of the transcription wherever needed.

2

Tag events

Event tags capture human actions and nuances (e.g. laugh, sigh, cough). Place each tag at the exact instance it occurs.

Transcription Guidelines

A few rules to keep corrected transcripts consistent and faithful to the audio.

1

Primary speaker only

If a clip has multiple speakers, transcribe and correct only the primary speaker's dialogue. Overlapping or background speech from other speakers should not be included.

2

What counts as a correction

Fixing casing, punctuation, and broken or garbled words is part of the review. These are the kinds of issues you're expected to clean up in the corrected transcript.

3

Keep the audio true to itself

Letters used to represent a sound in the audio should be kept as they are. Don't correct grammar that's actually present in the clip — if the speaker misspoke, keep the transcript original rather than “fixing” it.

Review Task — Mobile View

Same layout, one scroll

On a phone, Section 1 (audio + original transcript) and Section 2 (corrected transcript + tags) stack vertically instead of sitting side by side. Scroll down to move from listening and reading the original transcript into editing, tagging, and submitting.

- Tap a tag chip under “Insert event at cursor” to drop it exactly where your cursor sits in the transcript.
- Tap an emotion to start its span, then tap it again (or Unchanged) to close the span once the emotion ends.
- Accept as Correct, Reject, and Revert edit stay at the bottom of the screen once you've scrolled through the clip.

Top of screen — clip info, audio player, and the original transcript. Scrolled down — corrected transcript with event/emotion tag chips, plus Accept / Reject.

Tagging emotions and submitting

The final steps of the review task, from emotion spans to the next clip.

3

Identify the emotion

Emotion tags represent the underlying emotion behind the clip. Place the tag at the exact instance it took place.

4

Set the emotion's duration

For each new emotion tag, mark how long it lasts and close the tag at the end of that duration.

5

Mark the final status

Once the clip is reviewed and edited, mark it as Accept as Corrected or Rejected.

6

Move to the next clip

After a clip submitted, a new clip is automatically loaded for review.

Tagging an Emotion — Step by Step

1 Mark the start

Before any emotion is applied, the transcript is plain and shows “No tags”.

Place your cursor where the emotion begins, then tap the emotion chip (e.g. “curious”).

2 Span opens

`<|style_open|>curious<|style_body|>`

The tag is inserted and stays open. A chip reads “curious · open span” until you close it.

3 Close & submit

Move the cursor to where the emotion ends and tap “Close ‘curious.’” Then submit with Fix & Accept.

Event & Emotion Tag Reference

Two tag buckets appear on every clip. Event tags are listed in full below; the complete emotion library — all 19 tags with definitions, cues, lookalikes, and samples — is in the Appendix.

EVENT TAGS

A single instant in the clip

A short physical or vocal action, tagged at one exact point. Place your cursor in the transcript and tap a chip to insert it there.

laugh chuckle giggle breath inhale
exhale sigh sniff cough throat_clear
lip_smack gulp gasp yawn snort
cry woo hum_tune tsk um uh

Multiple event tags can appear anywhere in the same clip — insert as many as you hear.

EMOTION TAGS

A span across the clip

The underlying feeling behind a stretch of speech. Start the span where the emotion begins, and close it where it ends. There are 19 emotion tags in total:

anger annoyed awe curious excited fearful
flirty joyful loud menacing mischievous
nervous sad sarcastic smug surprised tender
thoughtful whisper

One span at a time. See the Appendix for the full definition, listen-for cues, lookalikes, and sample clips for every emotion tag.

STAGE 4 · APPENDIX

Full Emotion Tag Reference

All 19 emotion tags — clear definition, what to listen for, tags it's easily confused with, and reference samples for each one.

Anger

CLEAR DEFINITION

The speaker sounds very mad or upset. The voice may sound strong, sharp, or tense.

LISTEN FOR

Forceful or tense voice; sharp stress; clipped phrasing; raised intensity.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Annoyed** - usually milder.
- **Loud** - only volume.
- **Menacing** - usually involves a threat.

Annoyed

CLEAR DEFINITION

The speaker sounds irritated or tired of something, but not strongly angry.

LISTEN FOR

Exasperated or flat tone; drawn-out words; sighing quality; restrained sharpness.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Anger** - much stronger.
- **Sarcastic** - may mean the opposite of the words.
- **Sad** - unhappy, not irritated.

Awe

CLEAR DEFINITION

The speaker sounds amazed by something beautiful, impressive, or wonderful.

LISTEN FOR

Breathy or open tone; slower pace; widened pitch range; reverent emphasis.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Surprised** - unexpected, but may not admire it.
- **Joyful** - happy, but not necessarily amazed.
- **Excited** - more energy and eagerness.

Curious

CLEAR DEFINITION

The speaker wants to know, learn, or understand something.

LISTEN FOR

Questioning intonation; attentive energy; upward inflection; inviting pace.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Thoughtful** - thinking carefully, not looking for an answer.
- **Surprised** - a reaction to something unexpected.
- **Nervous** - worried, not interested.

Excited

CLEAR DEFINITION

The speaker sounds very eager, happy, and full of energy.

LISTEN FOR

Faster pace; higher pitch; lively rhythm; strong positive emphasis.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Joyful** - happy, but may sound calmer.
- **Surprised** - a sudden reaction.
- **Loud** - only about volume.

Fearful

CLEAR DEFINITION

The speaker sounds afraid because something dangerous or bad may happen.

LISTEN FOR

Shaky or breathy voice; urgency; higher pitch; pauses, gasps, or strained delivery.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Nervous** - worried, but there may be no clear danger.
- **Surprised** - unexpected, but may not be afraid.
- **Whisper** - only a quiet voice.

Flirty

CLEAR DEFINITION

The speaker sounds playful and shows romantic interest in someone.

LISTEN FOR

Teasing warmth; suggestive stress; playful rhythm; soft or inviting delivery.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Tender** - gentle and caring, but may not be romantic.
- **Mischievous** - playfully causing trouble.
- **Joyful** - happy, but not romantic.

Joyful

CLEAR DEFINITION

The speaker sounds clearly happy, pleased, or delighted.

LISTEN FOR

Smiling voice; bright resonance; buoyant rhythm; warm positive energy.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Excited** - more energy or eagerness.
- **Smug** - pleased with themselves or better than others.
- **Tender** - soft and caring.

Loud

CLEAR DEFINITION

The speaker talks at a high volume or sounds like they are shouting. The emotion can be different.

LISTEN FOR

Strong amplitude and projection; voice carries forcefully; may sound shouted.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Anger** - mad or upset.
- **Excited** - strong positive energy.
- **Menacing** - sounds threatening.

Menacing

CLEAR DEFINITION

The speaker sounds threatening or dangerous, as if they may harm or scare someone.

LISTEN FOR

Controlled low tone; deliberate pacing; ominous stress; cold or restrained intensity.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Anger** - mad, but may not be threatening.
- **Loud** - only about volume.
- **Smug** - feels superior, but is not threatening.

Mischievous

CLEAR DEFINITION

The speaker sounds playful or cheeky and may be planning harmless trouble.

LISTEN FOR

Conspiratorial or cheeky tone; playful stress; restrained amusement; knowing rhythm.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Menacing** - may cause harm or make a threat.
- **Flirty** - the playfulness shows romantic interest.
- **Sarcastic** - mocking or means the opposite.

Nervous

CLEAR DEFINITION

The speaker sounds worried, unsure, or uncomfortable. The voice may shake or hesitate.

LISTEN FOR

Hesitations; uneven rhythm; tight or shaky pitch; rushed words or fillers.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Fearful** - clear danger or strong fear.
- **Whisper** - only a quiet voice.

Sad

CLEAR DEFINITION

The speaker sounds unhappy, hurt, disappointed, or low in energy.

LISTEN FOR

Lower energy; slower pace; softer volume; falling pitch; heavy or tearful quality.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Tender** - gentle and caring.
- **Nervous** - worried or unsure.
- **Whisper** - only a quiet voice.

Sarcastic

CLEAR DEFINITION

The speaker sounds mocking or means the opposite of the words they say.

LISTEN FOR

Exaggerated stress; dry or flat tone; stretched words; noticeable mismatch with wording.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Annoyed** - directly shows irritation.
- **Smug** - pleased with themselves or superior.
- **Mischievous** - playful teasing, not necessarily mocking.

Smug

CLEAR DEFINITION

The speaker sounds very pleased with themselves and may feel better than others.

LISTEN FOR

Knowing tone; relaxed certainty; slight drawl; condescending or pleased emphasis.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Joyful** - simple happiness without superiority.
- **Sarcastic** - mocking or means the opposite.
- **Menacing** - sounds threatening.

Surprised

CLEAR DEFINITION

The speaker reacts to something they did not expect.

LISTEN FOR

Sudden pitch jump; sharp onset; widened intensity; brief gasp or pause.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Awe** - surprise also includes wonder or admiration.
- **Excited** - positive energy lasts longer.
- **Fearful** - afraid of danger.

Tender

CLEAR DEFINITION

The speaker sounds soft, gentle, caring, or loving.

LISTEN FOR

Soft warm tone; smooth pace; delicate emphasis; calm, intimate delivery.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Flirty** - shows romantic interest.
- **Sad** - feels sorrow or unhappiness.
- **Whisper** - only a quiet voice.

Thoughtful

CLEAR DEFINITION

The speaker sounds calm and is carefully thinking about something.

LISTEN FOR

Measured pace; intentional pauses; calm control; emphasis on key ideas.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Curious** - wants an answer or more information.
- **Nervous** - worried or unsure.
- **Sad** - unhappy or low.

Whisper

CLEAR DEFINITION

The speaker uses a very quiet, soft, and breathy voice.

LISTEN FOR

Breathy phonation; minimal vocal projection; close, soft delivery; reduced voicing.

REFERENCE SAMPLES

Reference clips from the Taxonomy sheet:

[Sample 1](#) · [Sample 2](#) · [Sample 3](#)

DO NOT CONFUSE WITH

- **Tender** - gentle and caring emotion.
- **Fearful** - afraid.
- **Nervous** - worried or unsure.

Key takeaways

- Log in with your email, then set a new password on first use.
- The dashboard tracks Accepted, Fixed, Rejected, and Total Submitted clips over any date range.
- Every review has two parts: listen & correct the transcript, then tag events and emotions with precise timing.
- Submit your decision — Accept as Corrected or Reject — and the next clip loads automatically.
- When in doubt on an emotion, check the Appendix: each tag lists what to listen for and what it's easily confused with.

Thank you — happy reviewing!
